- And an approved option for LHSON DNP students as Global Health and Missions (NUR 5349)

Sign up and additional information will be available through
Baylor University BEARSABROAD
<https://bearsabroad.baylor.edu/>

Graduate and undergraduate students from Nursing, Public Health and other Health related majors are invited to learn about global health from the One Health perspective. **One Health** considers health from a perspective of human, animal, and environmental health.

Our plans are to collaborate with our partners who have a sustainable community presence and clinical settings to explore global health concepts with real-world examples. We invite you to join us as we collect data for our longitudinal research study focusing on Child-Wellness in at-risk populations. In addition to learning about Global health from your Baylor University Public Health and Nursing Faculty you will learn about health in Rwanda from Rwandans.

OVERVIEW

Please join this once in a life-time opportunity to learn about global health while in Rwanda. Rwanda is a beautiful country in East Africa. This is a multidisciplinary study abroad collaboratively taught by **Dr. Beth Lanning** from Public Health and **Dr. Lori A. Spies** from Nursing.

Explore global health concepts through diverse hands on experiences. Spend a day in a village with a woman's cooperative, visit the challenging **Kigali Genocide Memorial** to an **adventurous and informative overnight safari**.

Join us for a unique multidisciplinary study abroad to explore cultural, community, environmental, economic, and political influences on global health. Visit Rwanda to expand your awareness, increase your knowledge, and enhance the effectiveness of your future global healthcare-related policy, practice, and public health endeavors. Take classes from Baylor Faculty with local expert speakers. Explore factors that contribute to population health through local health care experiences and with relevant excursions and cultural immersion experiences.

If you are a graduate or undergraduate nursing or public health student, pre-med or other related discipline looking to gain experience and making lasting memories the Global Health in Africa Study Abroad program is the right one for you!
